

Highest supply guarantee for float glass plants

Innovative products around technical gases

ReiCat is your competent partner for gas mixing units inside a float glass plant. ReiCat develops and produces systems to apply valuable technical gases efficient.

Your application

- Protective gas (nitrogen / hydrogen) required in large amounts for float glass production
- An un-interrupted gas supply has to be ensured
- On-site production of protective gas

Your advantages

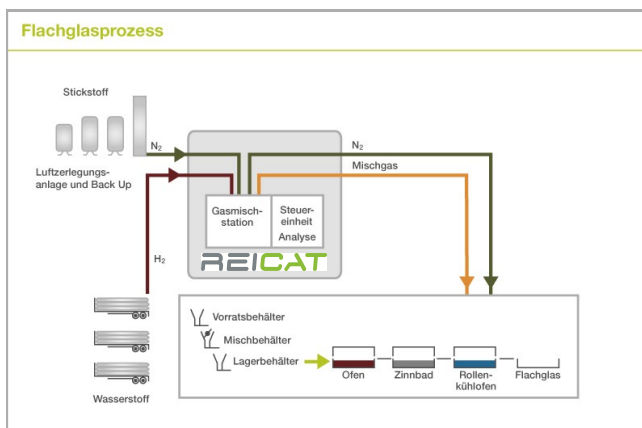

- High availability of unit
- Easy handling
- Less maintenance requirements
- Fully automated operation via remote control

Our solution

- Both, the redundant construction and the fully developed safety concept minimize the interruption of the plant

Special features

- Container concept
- Precise compliance with required mixing
- Remote control from control center (PLC) or via touch panel at site
- High safety standard
