

Precious and pure - catalysts

Advice, marketing and customer service for standard catalysts

ReiCat stands for experience and innovation in the field of exhaust air. ReiCat develops and produces systems according to the legal regulations (TA Luft - technical instructions on air quality) to purify harmful fumes. More than 35 years of experience in the field of catalyst development, manufacturing and application stand for best service for our customers.

Your application

Our highly specialised team is available to help and solve your problems. We pick the most suitable catalyst from those on the market and use them in our systems.

High effectiveness and long operating life in your process are the decisive criteria in selecting the right catalyst.

Your advantages

- High efficiency
- Small investment costs
- Long life cycle

Our solution

Another part of the ReiCat service: We take back the used catalyst. Today, applications know-how is essential for the success and efficiency of a process using a catalyst.

Catalysts are standard, but the application technology is a specialist discipline - our specialist discipline!

We know, what kind of catalyst has a special effect with which kind of gas. And we develop, adapt and integrate catalysts into complete systems - including service and process guarantee.

Special features

- Easy handling and maintenance
- Low energy consumption
- Possibility of precious metal recycling
