Clean air at the roasting process

Innovative products around exhaust air

ReiCat stands for experience and innovation in the field of exhaust air. ReiCat develops and produces systems according the statutory provision to purify harmful fumes.

Your application

- During the roasting process emerging harmful and odorous waste gases in form of hydrocarbons.

Your advantages

- Most effective reduction of odors and contaminations
- Permanent compliance of the legal regulations
- Problem-free retrofitting at existing roasters
- Low operation costs
- Long lifetime
- Low maintenance

Our solution

- These hydrocarbons - harmful for health and environment - are converted by the help of appropriate catalysts into harmless components (CO_2 and water)
- ReiCat offers individual designed waste gas purification units achieving a maximum of purification with a minimum of energy.

Special features

- Proven catalysts for conversion at temperatures as of 250°C
- Easy installation and mounting
- Individual construction and compact design
